User Stories

User Story #1	Play directly in browser
As a player, I want to play in a webpage so I don't need to install anything.	
The game runs fully in the browser without downloads.	<i>Priority: High</i> <i>Time Estimation: 6h</i>

User Story #2	Create account
As a new player, I want to create an account so I can save my progress and come back later.	
Users can register with username and password to access the game.	<i>Priority: High</i> <i>Time Estimation: 5h</i>

User Story #3	Log in to the game
As a returning player, I want to log in so I can continue my descent.	
User credentials are validated and the session starts.	<i>Priority: High</i> <i>Time Estimation: 4h</i>

User Story #4	View main menu
As a player, I want a clear main menu so I can choose what to do next.	
Menu displays New Descent, Continue Descent, Statistics and Tutorial options.	<i>Priority: High</i> <i>Time Estimation: 2h</i>

User Story #5	Start a new run
As a player, I want to start a new descent so I can experience a fresh run from the beginning.	
Clicking "New Descent" resets the run but keeps coins and upgrades.	<i>Priority: High</i> <i>Time Estimation: 2h</i>

User Story #6	Procedural map generation
As a player, I want each run to feel different so I can play it again without getting bored.	
The map layout changes each run.	<i>Priority: High</i> <i>Time Estimation: 6h</i>

User Story #7	Continue previous run
As a player, I want to continue my last run so I don't lose my progress.	
Clicking "Continue Descent" loads the saved data correctly.	<i>Priority: High</i> <i>Time Estimation: 4h</i>

User Story #8	See personal statistics
As a player, I want to view my stats so I can track my progress.	
The stats screen shows metrics like wins, deaths, coins and much more.	<i>Priority: Medium</i> <i>Time Estimation: 4h</i>

User Story #9	See global statistics
As a player, I want to view average stats so I can compare my progress.	
The stats screen shows metrics like wins, deaths, coins and much more.	<i>Priority: Medium</i> <i>Time Estimation: 4h</i>

User Story #10	Read a tutorial
As a player, I want to learn how to play the game before I start it.	
It takes you to another section of the webpage with step by step instructions that explain every detail necessary to begin playing.	<i>Priority: Medium</i> <i>Time Estimation: 2h</i>

User Story #11	Navigate map
As a player, I want to move through nodes so I can choose my path.	
Players can select adjacent nodes.	<i>Priority: High</i> <i>Time Estimation: 5h</i>

User Story #12	See node types
As a player, I want to identify nodes easily so I can plan my decisions.	
The nodes show an enemy, upgrade or rest stop visually.	<i>Priority: High</i> <i>Time Estimation: 3h</i>

User Story #13	Enter enemy node
As a player, I want to fight when choosing enemies so I can progress.	
The duel starts after selecting the enemy node.	<i>Priority: High</i> <i>Time Estimation: 2h</i>

User Story #14	See deck composition
As a player, I want to see how many sun and moon cards exist so I can plan my moves.	
The card count is shown before shuffle.	<i>Priority: High</i> <i>Time Estimation: 3h</i>

User Story #15	Shuffle deck
As a player, I want the deck to shuffle so outcomes are random.	
The deck randomizes each duel.	<i>Priority: High</i> <i>Time Estimation: 2h</i>

User Story #16	Choose target
As a player, I want to choose who receives the effect so I can control risk.	
Players can select themselves or the enemy.	<i>Priority: High</i> <i>Time Estimation: 3h</i>

User Story #17	Use Character Cards
As a player, I want to use cards from my character deck so I can influence the outcome of each turn.	
The player can select and play a card from their deck during their turn.	<i>Priority: High</i> <i>Time Estimation: 4h</i>

User Story #18	Apply Card Effects
As a player, I want card effects to activate correctly so the gameplay feels consistent and strategic.	
Each card applies its specific effect.	<i>Priority: High</i> <i>Time Estimation: 6h</i>

User Story #19	Lose and gain lives
As a player, I want my lives to update correctly so I understand the negative (or positive) consequences of my decisions in the game.	
The health system updates based on Sun and Moon card outcomes (and some character cards).	<i>Priority:</i> High <i>Time Estimation:</i> 3h

User Story #20	Automatic enemy turn
As a player, I want enemies to take turns automatically so the duel feels dynamic and challenging.	
Enemies execute their actions according to their difficulty and behavior rules automatically.	<i>Priority:</i> High <i>Time Estimation:</i> 6h

User Story #21	End of fight
As a player, I want the duel to end when the player or the enemy reaches zero lives so the game can progress correctly.	
The duel ends and displays win or loss when a participant reaches 0 lives.	<i>Priority:</i> High <i>Time Estimation:</i> 4h

User Story #22	Receive rewards after win
As a player, I want to receive coins, cards or upgrades after winning so I can improve my chances in future encounters.	
The system grants rewards based on enemy difficulty after a victory.	<i>Priority:</i> High <i>Time Estimation:</i> 4h

User Story #23	Purchase upgrades
As a player, I want to buy upgrades using coins so I can improve my performance in future battles.	
The player can spend coins to obtain upgrades like Card Binding or Life Extension.	<i>Priority:</i> High <i>Time Estimation:</i> 4h

User Story #24	Apply upgrade effects
As a player, I want upgrades to persist and affect gameplay so my decisions feel meaningful.	
Purchased upgrades modify gameplay.	<i>Priority: High</i> <i>Time Estimation: 6h</i>

User Story #25	Save game state
As a player, I want my data to be saved so I can resume exactly where I left off the game later.	
The system restores map position, deck, coins, and upgrades accurately.	<i>Priority: High</i> <i>Time Estimation: 5h</i>

User Story #26	Track player statistics in real time
As a developer, I want gameplay events to update statistics automatically so data remains accurate.	
Events like card usage, wins, and deaths update player statistics dynamically.	<i>Priority: Medium</i> <i>Time Estimation: 6h</i>

User Story #27	Update global statistics
As a developer, I want global statistics to aggregate all player data so I can analyze overall game performance.	
The system updates global metrics when players complete actions or runs.	<i>Priority: Medium</i> <i>Time Estimation: 6h</i>

User Story #28	Store player deck in database
As a developer, I want each player's deck to be stored persistently so it can be retrieved during different game sessions.	
The database stores owned cards, quantities, and bound status correctly.	<i>Priority: High</i> <i>Time Estimation: 5h</i>

User Story #29	Obtain character card info
As a player, I want to be able to be able to consult what each character card does by hovering over it.	
An event when the player's mouse hovers over their deck displays a text with its description.	<i>Priority: Low</i> <i>Time Estimation: 2h</i>

User Story #30	Play music during game events
As a player, I want to feel the theming of the game by having the songs that are played match the events within, such as boss fights or selection menus.	
The game will link its screens to certain audio files.	<i>Priority: Low</i> <i>Time Estimation: 1.5h</i>

User Story #31	Enter upgrade node
As the player, I want to be able to get my upgrades when entering the upgrade node and make the purchase be functional.	
The game will have a trigger for when the player stands on an upgrade node, a screen to accept or reject the upgrade is correctly displayed.	<i>Priority: Medium</i> <i>Time Estimation: 3h</i>

User Story #32	Health system
As a player, I want to be able to know how much HP there is left and how much I have got total.	
The candle system in the UI will display a pixel art representing a candle that will gradually melt to represent HP.	<i>Priority: Medium</i> <i>Time Estimation: 3h</i>

User Story #33	Card drawing animations
As a player, I want to see animations when drawing cards for the revelation of the great deck so it feels lively.	
The card drawing events will make the cards run an animation for when the cards are revealed.	<i>Priority: Medium</i> <i>Time Estimation: 2h</i>

User Story #34	Final duel with The Dealer
As a player, I want the match against The Dealer to feel different from the last ones so it feels like there has been a progression until that duel.	
The node with the final boss match will trigger a different song and animations for The Dealer.	<i>Priority: Low</i> <i>Time Estimation: 1h</i>

User Story #35	Feedback for damage
As the player, I want to be able to know that I have received my damage from a moon card when it is applied to me.	
The screen will dim because of the effect derived from losing a part of the candle.	<i>Priority: Low</i> <i>Time Estimation: 1h</i>

User Story #36	Character card acquirement
As the player, I want a fun and intuitive system to get my character cards that match my current difficulty.	
A system will provide character cards every time the great deck is depleted. It will match the enemy's difficulty and amounts will also vary by difficulty.	<i>Priority: High</i> <i>Time Estimation: 3h</i>

User Story #37	End of run screen
As a player, I want to know how my run went, showing whether I won or lost and my performance throughout the run, including some details of actions of my run.	
When the run is finished, a screen showing stats and win or loss state will show up.	<i>Priority: Low</i> <i>Time Estimation: 3h</i>

User Story #38	Sound inclusion
As a player, I want to deepen my immersion of the game by listening to sound effects that are related to my current actions within the game.	
Triggers will be added to actions like drawing, clicking through menus, etc., in order to fully immerse the player to the game.	<i>Priority: Low</i> <i>Time Estimation: 2h</i>

User Story #39	Card rarity
As a player, I want to be able to tell the rarity of my cards in order to understand its importance within gameplay.	
Within the cards description, a coloured text will indicate its rarity.	<i>Priority: Low</i> <i>Time Estimation: 0.5 h</i>

User Story #40	New Descent Warning
As a player, will want to make sure that when I click on a New Descent, I want to start from zero instead of continuing the game in case i did not mean to click on it.	
An “Are you sure?” screen will pop up in order to prevent accidental run loss.	<i>Priority: low</i> <i>Time Estimation: 1h</i>
